

Type 23 Lift Check Valve

AXON's Type 23 Lift Check Valve has been developed to suit the production applications in severe corrosion conditions. The Type 23 is optimized for a variety of applications; for example, the lift check is spring-loaded to ensure its service in each position.

SPECIFICATIONS

Technical Details

- Designed for pressures of 2k to 15k psi WP
- Sizes from 2.1/16" to 4.1/16" available
- Material made of DD to HH-NL
- Quality level of PSL2 to PSL3G
- Temperature from L to U
- PR2 tested

FEATURES / BENEFITS

Design

- Forged body construction
- Spring loaded check
- Cobalt alloy seat
