

# Type G Gate Valve

AXON's Type G Gate Valve offers bidirectional sealing in high and low pressures, for oil or gas, with the dual seat seal. PR2 certified, the valve is compatible with your manifold and production applications in the most severe corrosion conditions.

## SPECIFICATIONS

### Technical Details

- Designed for pressures of 2k to 15k psi WP
- Sizes from 2.1/16" to 7.1/16" available
- Material class DD, HH-NL
- Quality level PSL2 - PSL3G
- Temperature class L - U
- PR2 + Appendix F approved

## FEATURES / BENEFITS

### Design

- Tungsten carbide facings
- Dual seat seal for high/low pressure seal
- Forged body construction
- Solid one piece seats and gate
- Available in handwheel, hydraulic and pneumatic configuration
